

# Institutional Pitch Portfolio & Strategic Master Plan

Prepared for National and Global Philanthropic Partners, Diaspora Foundations & Corporate CSR Directors

## Section 1: Premium Visual Brand Identity & Design Token Spec

This section establishes the unified visual language and design guidelines applied across all slides, reports, and digital portals of the Trust.<sup>1</sup>

| BRAND COLOR MATRIX (HEX) |                      |                       |
|--------------------------|----------------------|-----------------------|
|                          |                      |                       |
|                          |                      |                       |
| Deep Emerald Green       | Golden Ochre Accent  | Soft Charcoal Text    |
| #005C3E (60% Domin)      | #C5A059 (20% Accent) | #2B2B2B (Light Mode)  |
|                          |                      |                       |
| Pearl Canvas White       | Pure Crimson Red     | Muted Blue Border     |
| #FDFBF7 (Background)     | #D32F2F (Alert/Red)  | #1E88E5 (Design Line) |

- **Color Strategy (60-30-10 Rule):**
  - **60% Dominant (Deep Emerald Green - #005C3E):** Establishes medical trust, vitality, and the foundational values of Islamic social philanthropy.<sup>2</sup>
  - **30% Structure (Pearl Canvas White - #FDFBF7 & Soft Charcoal - #2B2B2B):** Provides a warm, high-contrast reading environment that avoids cold, clinical, sterile white backgrounds.<sup>1</sup>

- **10% Accent (Golden Ochre - #C5A059 & Crimson Red - #D32F2F):** Reserved for highlights, key metrics, compliance seals, and highlighting emergency disaster response operations.<sup>1</sup>
- **Typography Hierarchy:**
  - **Hero Headers:** *Playfair Display* (Serif) – Projects institutional authority, history, and legacy.<sup>1</sup>
  - **Subheadings & Body Text:** *Montserrat* or *Inter* (Sans-Serif) – Clean geometric lines optimized for readability on projection screens and mobile devices.<sup>1</sup>
- **Layout and Composition Rules:**
  - **Whitespace Margin:** Maintain a minimum of 35% empty canvas area on all slide designs to ensure breathing room and focus.
  - **Visual Grid:** Two-column split grids are preferred to balance narrative data with real-world clinical action shots.<sup>1</sup>
  - **No Generic Graphics:** All icons must be clean, single-line vectors in Emerald Green or Golden Ochre. Only actual field photographs of clinical interventions, diagnostics, and community operations may be used as background textures or hero images.<sup>1</sup>

## Section 2: Executive Institutional Profile and Governance Framework

The delivery of equitable healthcare in metropolitan Karachi, Pakistan, represents one of the most pressing humanitarian challenges of the twenty-first century. As an urban center characterized by rapid demographic expansion and deep socioeconomic disparities, Karachi requires robust, non-state institutional frameworks to supplement the public healthcare safety net. Established in 2005 by the philanthropist Himayatullah Sadukhani, the Khidmat-e-Alam Welfare Trust has developed from a localized clinic into a multi-sectoral, highly accredited non-profit organization.<sup>2</sup> Headquartered at 351 Usmania Society, B-Road, Nazimabad No. 1, Karachi, the trust operates at the intersection of professionalized clinical care and faith-based social philanthropy.<sup>3</sup>

The institutional foundation of the trust is guided by a formal vision: to construct a thriving, socially equitable society where access to quality healthcare, primary education, and clean drinking water is guaranteed as a fundamental human right, independent of financial capacity.<sup>1</sup> Its organizational mission translates this vision into practice by establishing structured, transparent, and highly subsidized medical facilities, public utility installations, and social safety nets designed to preserve human dignity.<sup>1</sup>

To maintain institutional trust and secure local and international funding, the trust has built a comprehensive regulatory and compliance portfolio.<sup>1</sup> This compliance framework ensures that all operations are auditable, legally sound, and aligned with national and international standard practices.<sup>1</sup>

|                      |                          |                     |
|----------------------|--------------------------|---------------------|
| Regulatory Authority | Statutory Registration / | Compliance Status & |
|----------------------|--------------------------|---------------------|

|                                                               | License                                                              | Governance Implications                                                                                                                                |
|---------------------------------------------------------------|----------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Pakistan Centre for Philanthropy (PCP)</b>                 | Certified NPO Status (No. PCP-202A/1) <sup>1</sup>                   | Validates internal governance, financial management systems, and project delivery mechanisms against national standards.                               |
| <b>Sindh Healthcare Commission (SHCC)</b>                     | Regular Multi-Specialty Clinical License (No. D20A2004) <sup>1</sup> | Certifies that the physical medical center, pharmacy, laboratory, and diagnostics meet the provincial Minimum Service Delivery Standards. <sup>4</sup> |
| <b>Federal Board of Revenue (FBR), Government of Pakistan</b> | Taxpayer Registration (No. 2567138) <sup>1</sup>                     | Grants formal status as an income tax-exempt non-profit entity, allowing corporate and individual donors to claim tax deductions.                      |
| <b>Sindh Charities Registration and Regulation Commission</b> | Registered Charity <sup>1</sup>                                      | Verifies compliance with provincial charity laws, granting legal authority to raise and deploy public funds for humanitarian relief. <sup>1</sup>      |
| <b>Sindh Trust Act 2021</b>                                   | Registered and Certified <sup>1</sup>                                | Establishes the legal, fiduciary, and trust-based structures under current provincial trust administration frameworks. <sup>1</sup>                    |
| <b>International Organization for Standardization (ISO)</b>   | ISO Certified <sup>1</sup>                                           | Confirms that operational workflows, patient handling protocols, and administrative processes                                                          |

|                                                              |                                                                              |                                                                                                                                                           |
|--------------------------------------------------------------|------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                              |                                                                              | align with global quality management systems. <sup>1</sup>                                                                                                |
| <b>Securities and Exchange Commission of Pakistan (SECP)</b> | Registration Under Process <sup>1</sup>                                      | Intended to transition the trust's corporate structure to a public-interest company, enhancing transparency for global institutional donors.              |
| <b>Directorate of Labour, Government of Sindh</b>            | Registered under Shops & Commercial Establishments Act (No. 27) <sup>1</sup> | Ensures compliance with provincial labor standards, fair wage policies, and workplace safety regulations for all clinical and support staff. <sup>1</sup> |

The internal governance structure of the trust is designed around a transparent administrative model.<sup>1</sup> Led by the Chairman, Mr. Himayatullah Sadukhani, the Board of Trustees provides oversight on policy, financial management, and long-term planning.<sup>2</sup> The board is supported by a professional clinical management team that oversees daily operations at the medical center, a dedicated welfare office that manages financial assistance, and a logistics and volunteer coordination department.<sup>6</sup> This clear division of responsibilities ensures that administrative decisions are guided by data and that financial contributions are directed precisely to where they are needed most.<sup>1</sup>

## Section 3: Clinical Ecosystem and Specialized Services

The central hub of the trust's healthcare delivery is the Khidmat-e-Alam Medical Centre, located in the Gulbahar Usmania Colony of Nazimabad, Karachi.<sup>7</sup> Operating as a 24-hour medical facility, the center is designed to provide comprehensive, integrated healthcare services under one roof, serving hundreds of low-income patients daily.<sup>1</sup>

The medical center's operations are divided into several specialized departments:

- Specialist Outpatient Clinics (OPD):** The OPD operates a multi-specialty clinical model where senior medical specialists provide consultation services.<sup>1</sup> The specialist panel includes pediatricians (Child Specialists), family physicians, neuro-physicians, consultant physicians, dermatologists, gynecologists, sonologists, diabetologists, and senior gastroenterologists and hepatologists.<sup>1</sup> Notably, the clinical team includes senior consultants such as Assist. Prof. Dr. Shah Nawaz, a Gastroenterologist with 18 years of clinical experience.<sup>7</sup> By centralizing these specialties, the trust removes the need for patients to travel to multiple clinics, reducing both travel costs and wait times.<sup>1</sup>
- 24-Hour Urgent Care Unit:** Designed for immediate medical intervention, this unit is staffed around the clock by experienced emergency physicians, nurses, and paramedical

personnel.<sup>1</sup> It serves as a critical stabilization unit for acute trauma, cardiac events, respiratory distress, and pediatric emergencies before referral or discharge.<sup>1</sup>

- **Diagnostic Centre:** The diagnostic wing is equipped with high-precision laboratory testing, digital radiography (X-Ray), electrocardiography (ECG), and ultrasound imaging units.<sup>1</sup> The laboratory is certified for clinical accuracy, providing the essential diagnostic data required for clinical decision-making.<sup>1</sup>
- **Fully Equipped Pharmacy:** Managed by qualified pharmacists, the pharmacy maintains strict inventory controls and proper storage conditions to ensure the quality of all dispensed medications.<sup>1</sup> It operates in direct coordination with the OPD to manage prescribing patterns and ensure the continuous availability of essential medicines.<sup>1</sup>
- **Emergency Medical Equipment and Ambulance Fleet:** The trust provides a 24-hour ambulance service to ensure safe patient transport.<sup>1</sup> Additionally, it provides essential medical equipment—including oxygen cylinders, wheelchairs, nebulizers, crutches, walkers, stethoscopes, drip stands, glucometers, and BP apparatuses—completely free of charge for home use, removing a significant financial barrier for families caring for chronic or terminally ill patients.<sup>1</sup>

To ensure that high-quality healthcare remains accessible to low-income individuals, the trust operates a structured Welfare Office.<sup>1</sup> This office manages a transparent financial aid workflow modeled to meet the compliance requirements of the Pakistan Centre for Philanthropy (PCP).<sup>1</sup> Standard walk-in patients receive an immediate 25% subsidy on diagnostic services and medicines.<sup>1</sup> For patients experiencing greater financial hardship, a formal screening process is initiated using a standardized *Medical Welfare Application Form*.<sup>1</sup> This form records household income, monthly utility expenses, dependants, and medical diagnoses to determine eligibility.<sup>1</sup> Eligible cases receive a 50% subsidy funded through the trust's Zakat reserves.<sup>1</sup> In cases of extreme financial distress, the patient is referred to the central administration for 100% full sponsorship.<sup>1</sup>

Beyond clinical medicine, the trust addresses environmental determinants of health through its Water Sanitation and Hygiene (WASH) programs.<sup>8</sup> Recognizing that contaminated water is a major driver of gastrointestinal diseases, the trust operates three clean water projects: public drinking facilities (Sabeel), deep groundwater bore wells, and a modern Reverse Osmosis (RO) purification plant.<sup>10</sup> The output of the RO plant is regularly tested and certified by the Aga Khan University Laboratory and the Pakistan Council of Scientific and Industrial Research (PCSIR) to ensure it meets strict biological and chemical safety standards.<sup>10</sup>

To evaluate the operational efficiency of the RO purification plant, the trust utilizes a standard volumetric purification yield model:

$$\eta_{RO} = \left( \frac{V_{pure}}{V_{source}} \right) \times 100$$

Where:

- $\eta_{RO}$  represents the water purification efficiency percentage.
- $V_{pure}$  represents the volume of certified, safe drinking water successfully dispensed to the community.<sup>10</sup>
- $V_{source}$  represents the raw groundwater extracted from the deep bore wells.<sup>10</sup>

By monitoring this efficiency metric, the engineering team manages water waste, tracks filter membrane wear, and ensures that local communities receive clean drinking water at the lowest possible operating cost.<sup>1</sup>

## Section 4: Operational Excellence, Cost Control & Triage Field Case Study

A core tenet of the Khidmat-e-Alam Welfare Trust's philosophy is absolute financial transparency and operational efficiency.<sup>1</sup> This section presents a direct operational audit of a major field campaign, demonstrating exact accountability for donor funds.

### The 70% Direct Healthcare Allocation Rule

As verified by the trust's public audit and financial transparency disclosures, **70% of the organization's total medical budget is spent solely and exclusively on free medicines for patients** [Image 4]. This exceptional ratio provides clear proof that donor contributions are routed directly into patient care and essential treatments, bypassing administrative inflation [Image 4, Image 7].

### Camp No. 01 Case Study: Old Golimar Outreach Audit

- **Date of Camp:** April 26, 2026 [Image 3, Image 6]
- **Location Served:** Old KMC Quarters, Old Golimar, Karachi [Image 6]
- **Operational Duration:** 6 hours continuous service (10:00 AM to 4:00 PM) [Image 6]
- **Total Registered Patients Treated:** 320 [Image 6, Image 7]
- **Emergency Cases Immediately Stabilized:** 30 [Image 6, Image 7]

#### 1. Detailed Patient Demographics & Age Analysis

The camp served as a critical safety net, specifically reaching the most vulnerable, under-served segments of the Old Golimar community [Image 7, Image 8].

- **Gender Distribution [Image 8]:**
  - *Women and Girls (Majority):* 208 patients (65.0%) [Image 7, Image 8]
  - *Men and Boys:* 102 patients (35.0%) [Image 8]
- **Age Profile & Healthcare Green Index [Image 3]:**
  - *Children (Under 12 years):* 124 patients (38.75%) – indicating high demand for pediatric care [Image 3, Image 7].
  - *Adults (12 to 60 years):* 163 patients (50.94%) – composed of 127 women and 36 men [Image 3].
  - *Elderly (60+ years):* 13 patients (4.06%) – composed of 12 women and 11 men [Image 3].

## 2. Administrative Cost Control & Budget Distribution [Image 5]

The total administrative cost incurred for executing Camp No. 01 was strictly limited to **Rs 76,500** [Image 5]. The breakdown below shows absolute transparency in operational overhead:

| Administrative Line Item | Resource Parameters & Headcount                                 | Total Cost (PKR)    | Percentage of Admin Budget |
|--------------------------|-----------------------------------------------------------------|---------------------|----------------------------|
| Doctors' Fees            | 3 Qualified Medical Professionals [Image 5]                     | Rs 18,000 [Image 5] | 23.53%                     |
| Nursing Staff Honorarium | 4 Qualified Nursing/Paramedical Staff [Image 5]                 | Rs 12,000 [Image 5] | 15.69%                     |
| Volunteers Allowance     | 8 Deployed Volunteers (including fuel) [Image 5]                | Rs 20,000 [Image 5] | 26.14%                     |
| Catering & Logistics     | Tent, patient chairs, tables setup [Image 5]                    | Rs 15,000 [Image 5] | 19.61%                     |
| Food & Hydration         | Lunch boxes for clinical team [Image 5]                         | Rs 4,500 [Image 5]  | 5.88%                      |
| Generator Fuel           | Continuous power backup for equipment [Image 5]                 | Rs 4,000 [Image 5]  | 5.23%                      |
| Transportation           | Logistics, medicine trunks, and clinical team transit [Image 5] | Rs 3,000 [Image 5]  | 3.92%                      |

|                  |                                                |                     |         |
|------------------|------------------------------------------------|---------------------|---------|
| Total Admin Cost | Executed under strict fiscal control [Image 5] | Rs 76,500 [Image 5] | 100.00% |
|------------------|------------------------------------------------|---------------------|---------|

3. Quantitative Medicine Inventory Analysis (Bulk Outreach Audit)

During this community outreach campaign, the total medicine investment was **Rs 1,80,999.76**, delivering **2,751 total medicine units** across **30 unique medicine items** and **6 major therapeutic categories**.<sup>1</sup>

- **Age-Appropriate Formulations:** The strategic dominance of syrups (60%) ensures that liquid-based, easily consumable medicines are readily available for vulnerable pediatric and geriatric patients who cannot swallow solid doses.<sup>1</sup>
- **Therapeutic Category Prioritization:** To address the highest-burden community health needs, the budget is strategically allocated as follows:
  - *Respiratory & Gastrointestinal (GI) Treatments:* 10 items | GI, Acid, Cough, Allergy remedies (43.3% of budget)<sup>1</sup>
  - *Anti-Infectives (Antibiotics & Antifungals):* 4 items | Broad-spectrum treatment (16.6% of budget)<sup>1</sup>
  - *Vitamins & Nutritional Supplements:* 4 items | Calcium, Vitamin D3, B12 (14.6% of budget)<sup>1</sup>
  - *Pain, Inflammation & Analgesics:* 5 items | Analgesics & NSAIDs (14.0% of budget)<sup>1</sup>

### Top 5 Medicine Investment Drivers

1

The table below illustrates the top 5 medicine items that represent the core financial commitment of the outreach campaigns, targeting the most prevalent community illnesses.<sup>1</sup>

| Medicine Item        | Therapeutic Category / Purpose                 | Total Camp Investment (PKR) |
|----------------------|------------------------------------------------|-----------------------------|
| Hydril Syrup         | Cough Preparation / Respiratory Relief         | Rs 13,920.00 <sup>1</sup>   |
| Adacip 500MG Tablet  | Ciprofloxacin / Broad-Spectrum Anti-Infective  | Rs 11,640.00 <sup>1</sup>   |
| Zaprole Plus Tablet  | Esomeprazole / Gastrointestinal & Acid Control | Rs 11,639.71 <sup>1</sup>   |
| Dolor DS Syrup       | Mefenamic Acid / Pediatric Pain & Inflammation | Rs 10,125.00 <sup>1</sup>   |
| Multidon 120ML Syrup | Multivitamins / Nutritional Support            | Rs 10,000.00 <sup>1</sup>   |

## Section 5: Strategic Community Campaigns & Seasonal Programs

The trust expands its impact by addressing seasonal religious obligations and climate-driven community needs.<sup>2</sup>

### The Annual Qurbani Campaign (Eid-ul-Adha)

In accordance with Sunnah and religious obligations, the trust operates a highly organized, hygienic, and transparent **Annual Qurbani Program** to distribute fresh meat directly to orphans, widows, and highly impoverished families living below the poverty line across Karachi.<sup>8</sup>

| ANNUAL QURBANI PACKAGES (PKR)      |                      |                  |
|------------------------------------|----------------------|------------------|
| Goat Qurbani (Waqf / Full Animal)  | ████████████████████ | Rs 22,000 [Im10] |
| Cow Qurbani (Communal Shared Part) | ████████████████████ | Rs 32,000 [Im10] |

- **Sponsorship Tiers & Packages [Image 10]:**
  - **Goat Qurbani (وقف قربانی):** Rs 22,000 per animal. Fully sponsored animal sacrifice, with 100% of the meat distributed directly to registered deserving families [Image 10].
  - **Cow Qurbani Share (حصے کی قربانی):** Rs 32,000 per share. Participatory share according to Sunnah, including complete carcass processing and distribution under hygienic conditions [Image 10].
- **Trust Pillars & Donor Assurance [Image 10]:**
  - *Direct Delivery:* Meat is routed directly to verified families in remote, peri-urban settlements [Image 10].
  - *Transparent Systems:* Donors receive proof of sacrifice and distribution audits [Image 10].
  - *Professional Logistics:* Operations are managed at the central Nazimabad facility with cold-storage transport to ensure food safety.<sup>3</sup>

## Section 6: Comprehensive Donor Proposal: The 18 Free Medical Camps Campaign

The peripheral, informal settlements of Karachi are characterized by high poverty indices, safe water deficits, and a lack of functional primary healthcare facilities.<sup>1</sup> Families in these areas face a compound burden: clean water shortages, poor sanitation, and high transport costs that delay seeking medical care until preventable illnesses become life-threatening.<sup>1</sup>

To address these healthcare gaps, the trust has developed a targeted campaign: the **18 Free Medical Camps Initiative**.<sup>1</sup> Scheduled to run from April to December, this campaign aims to establish a mobile clinical presence in highly neglected zones.<sup>1</sup> Each camp is designed as an all-inclusive, mobile primary care clinic capable of treating at least 250 patients per day,

delivering healthcare directly to those who need it most.<sup>1</sup>

The workflow of each camp is structured to ensure safe, rapid, and transparent patient processing.<sup>1</sup> Upon arrival, patients are registered and triaged.<sup>1</sup> They then receive baseline diagnostic screening for blood pressure, blood glucose, and malaria.<sup>1</sup> Deployed medical doctors evaluate each patient, write diagnoses, and prescribe treatments.<sup>1</sup> Finally, patients receive their full course of essential medicines alongside public health counseling on hygiene, hydration, and nutrition.<sup>1</sup>

The operational budget for a single medical camp is set at Rs 105,000 PKR, bringing the total budget for the 18-camp network to Rs 2,000,000 PKR, which includes administrative oversight and logistics.<sup>1</sup>

| Camp Budget Line Item                 | Cost per Camp (PKR)    | Percentage of Camp Budget | Operational Scope & Deliverables                                                                            |
|---------------------------------------|------------------------|---------------------------|-------------------------------------------------------------------------------------------------------------|
| Pharmaceuticals & Medical Consumables | Rs 35,000 <sup>1</sup> | 33.3% <sup>1</sup>        | Bulk procurement of anti-infectives, pediatric syrups, analgesics, and diagnostic test strips. <sup>1</sup> |
| Clinical Staff Honoraria              | Rs 33,000 <sup>1</sup> | 31.4% <sup>1</sup>        | Compensation for 2 qualified medical doctors, 2 paramedics, and clinical coordinators. <sup>1</sup>         |
| Logistics, Tents &                    | Rs 20,000 <sup>1</sup> | 19.1% <sup>1</sup>        | Safe canopy structures, seating,                                                                            |

|                                         |                                |                            |                                                                                               |
|-----------------------------------------|--------------------------------|----------------------------|-----------------------------------------------------------------------------------------------|
| <b>Equipment</b>                        |                                |                            | generators, medical tables, and diagnostic tools. <sup>1</sup>                                |
| <b>Transport, Meals &amp; Hydration</b> | Rs 17,000 <sup>1</sup>         | 16.2% <sup>1</sup>         | Logistics for moving clinical teams and pharmaceutical inventory to rural sites. <sup>1</sup> |
| <b>Total Camp Cost</b>                  | <b>Rs 105,000 <sup>1</sup></b> | <b>100.0% <sup>1</sup></b> | Delivers primary care and medicines to 250+ rural patients. <sup>1</sup>                      |

To track the cost-effectiveness of these medical camps, the administrative team monitors the unit cost of healthcare delivery:

$$C_{unit} = \frac{E_{total}}{N_{treated}}$$

Where:

- $C_{unit}$  is the average operational cost per patient treated.
- $E_{total}$  is the total expenditure incurred for a single medical camp (Rs 105,000 PKR ).<sup>1</sup>
- $N_{treated}$  is the total number of patients who receive medical care and pharmacy services (  $\geq 250$  patients ).<sup>1</sup>

$$C_{unit} = \frac{105,000}{250} \approx 420 \text{ PKR per patient}$$

This demonstrates a highly optimized delivery model, where a donation of just Rs 420 PKR (~\$1.50 USD) provides a vulnerable patient with a clinical consultation, diagnostic screening, and a full course of prescription medication.<sup>1</sup>

To fund this campaign, the trust has established a structured sponsorship framework for corporate, institutional, and individual donors <sup>1</sup>:

- **Single Camp Sponsor (Rs 105,000 PKR):** Fully funds one mobile clinic, providing

healthcare to 250+ patients in a selected rural community.<sup>1</sup> The sponsor receives a detailed post-camp impact and financial report.<sup>1</sup>

- **Dual Camp Sponsor (Rs 210,000 PKR):** Funds two mobile clinics, expanding outreach into remote pockets of Gadap or Ibrahim Hyderi.<sup>1</sup>
- **Five Camp Sponsor (Rs 500,000 PKR):** Funds five camps, establishing a recurring healthcare presence in a selected district to track health outcomes over multiple months.<sup>1</sup>
- **Key Programmatic Partner (Rs 1,000,000 PKR):** Sponsors half of the annual campaign (9 camps).<sup>1</sup> Partners receive prominent branding on all mobile clinics, promotional materials, and annual impact reports.<sup>1</sup>
- **Full Campaign Patron (Rs 2,000,000 PKR):** Fully funds the entire 18-camp network.<sup>1</sup> The patron receives comprehensive CSR alignment, a seat on the programmatic oversight committee, and quarterly performance updates.<sup>1</sup>

## Section 7: Proposed Capital Infrastructure Projects (Capital Expansion)

To expand its services and meet the growing healthcare needs of metropolitan Karachi, the trust has designed several key clinical infrastructure projects.<sup>10</sup> These planned facilities will be integrated into the existing Medical Centre, transforming it into a comprehensive healthcare institution.<sup>10</sup>

The clinical justification and estimated setup costs for these proposed expansion projects are outlined below:

| Proposed Expansion Department       | Clinical Justification & Population Impact                                                   | Planned Infrastructure and Equipment                                                                                                                                        |
|-------------------------------------|----------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Neonatal Intensive Care Unit (NICU) | Addresses high neonatal mortality rates in surrounding low-income settlements. <sup>10</sup> | Dedicated incubators, neonatal ventilators, phototherapy units, and specialized nursing stations. <sup>10</sup>                                                             |
| Maternity and Gynecology Wing       | Provides safe, dignified, and 24-hour maternal care for low-income mothers. <sup>10</sup>    | Two fully equipped labor rooms and four operation theaters (two for gynecological surgeries, one for eye surgeries, and one for general surgical procedures). <sup>10</sup> |

|                                            |                                                                                                     |                                                                                                                             |
|--------------------------------------------|-----------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------|
| <b>Specialized Eye Department &amp; OT</b> | Targets high rates of preventable blindness, cataracts, and diabetic retinopathy. <sup>10</sup>     | Dedicated ophthalmology diagnostics, lens fitting equipment, and an operating theater for cataract surgeries. <sup>10</sup> |
| <b>Dental Clinic</b>                       | Addresses the lack of affordable oral hygiene and dental care in the area. <sup>10</sup>            | Complete dental chairs, digital X-Ray imaging, autoclaves, and specialized dental surgery equipment. <sup>10</sup>          |
| <b>Physiotherapy Center</b>                | Supports patients recovering from stroke, spinal cord injuries, or orthopedic trauma. <sup>10</sup> | Rehabilitation machinery, therapeutic ultrasound devices, traction units, and mobility training zones. <sup>10</sup>        |

These infrastructure projects are designed to appeal to international donors, institutional foundations, and the global Pakistani diaspora.<sup>11</sup> Diaspora communities—primarily located in the US, UK, Canada, Australia, and the Gulf—are major contributors to development and relief projects in Pakistan, frequently looking for structured, high-impact projects to channel their charitable giving and Zakat.<sup>11</sup>

To connect with these global donor networks, the trust presents these expansion projects as distinct capital investment opportunities. International donors can fund a specific room, purchase a key piece of clinical equipment (such as an NICU incubator), or sponsor an entire wing.<sup>10</sup> This model allows donors to see the direct physical impact of their contributions.<sup>11</sup> Every sponsored project includes a permanent dedication plaque, regular updates on setup progress, and annual reports detailing the number of patients treated and clinical outcomes achieved in that specific unit.<sup>10</sup>

## Section 8: Strategic Corporate Social Responsibility (CSR) Proposal

For corporate entities operating in Pakistan, Corporate Social Responsibility (CSR) has evolved from general philanthropy into a core business practice closely tied to regulatory compliance, local community relations, and global Environmental, Social, and Governance (ESG) standards. The trust's CSR partner model is designed to help businesses achieve these corporate objectives while creating sustainable, measurable social value.<sup>1</sup>

By partnering with the trust, companies can align their CSR budgets with projects that address critical local needs.<sup>1</sup> The trust's CSR framework is built upon four operational pillars<sup>1</sup>:

To help corporate partners evaluate their social investments, the trust provides a clear ESG impact mapping framework <sup>1</sup>:

| CSR Pillar                          | Core Trust Activities & Alignment                                                                                                                                                                          | Key ESG and Compliance Benefits for Corporate Partners                                                                                                                                                                                  |
|-------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Social Impact</b>                | <ul style="list-style-type: none"> <li>• Running free mobile medical camps in rural areas.<sup>1</sup></li> <li>• Providing highly subsidized specialty care at the Medical Centre.<sup>1</sup></li> </ul> | <ul style="list-style-type: none"> <li>• Direct contribution to healthcare access indicators in industrial zones.<sup>1</sup></li> <li>• Demonstrable support for vulnerable maternal and pediatric populations.<sup>1</sup></li> </ul> |
| <b>Environmental Sustainability</b> | <ul style="list-style-type: none"> <li>• Operating solar-powered medical equipment.<sup>1</sup></li> </ul>                                                                                                 | <ul style="list-style-type: none"> <li>• Help corporate partners meet carbon reduction and</li> </ul>                                                                                                                                   |

|                                           |                                                                                                                                                                                                         |                                                                                                                                                                                                                           |
|-------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                           | <ul style="list-style-type: none"> <li>• Managing RO water plants with water-saving filtration loops.<sup>1</sup></li> </ul>                                                                            | <p>water stewardship targets.<sup>1</sup></p> <ul style="list-style-type: none"> <li>• Support green energy initiatives in clinical settings.<sup>1</sup></li> </ul>                                                      |
| <b>Ethical Practices &amp; Governance</b> | <ul style="list-style-type: none"> <li>• Strict compliance with SHCC, PCP, FBR, and ISO standards.<sup>1</sup></li> <li>• Auditable and transparent case screening forms.<sup>1</sup></li> </ul>        | <ul style="list-style-type: none"> <li>• Eliminate corporate compliance risks through fully certified channels.</li> <li>• Secure 100% tax deductions on corporate CSR contributions.</li> </ul>                          |
| <b>Employee Engagement</b>                | <ul style="list-style-type: none"> <li>• Facilitating corporate volunteer programs at clinical camps.<sup>6</sup></li> <li>• Offering certified community service opportunities.<sup>6</sup></li> </ul> | <ul style="list-style-type: none"> <li>• Strengthen corporate team cohesion through shared social purpose.<sup>6</sup></li> <li>• Enhancing local employer brand and corporate community presence.<sup>1</sup></li> </ul> |

Through this structured approach, corporate partnerships with the trust deliver measurable social impact, secure valuable tax incentives, and provide clear reporting that strengthens the partner's overall ESG profile.<sup>1</sup>

## Section 9: Premium Presentation Storyboard and Design System

To present the trust's work professionally to institutional, corporate, and international donors, this section details a premium visual identity and a slide-by-slide storyboard for an investor-grade pitch deck. This storyboard explicitly incorporates the visual data from the uploaded organizational images, transforming real-world field actions into professional slides.

### 12-Slide Pitch Deck Storyboard

#### Slide 1: Cover Layout — Title & Legacy

- **Visual Composition:** Full-bleed deep emerald green canvas (#005C3E). In the center, a premium, high-resolution rendering of the official bilingual logo card (from **Image 1 of Batch 1**), showing the green "KA" letters, the symbolic shaking hands, and the red crescent-shaped ring of humanitarian service [Image 1, Image 2].
- **Primary Title (Playfair Display, Warm Gold, Bold):** "Dignity in Healthcare, Excellence in Service".<sup>1</sup>

- **Subtext (Montserrat, Soft Off-White):** "Institutional Profile & Investment Opportunities 2026. Serving Humanity with Compassion since 2005".<sup>1</sup>

## Slide 2: The Healthcare Challenge — Karachi's Socio-Climatic Crisis

- **Visual Composition:** Split-screen layout. Left side: High-contrast reproduction of **Image 2 of Batch 1** showing the elderly woman in classic indoor heat stress and the manual laborer under the scorching sun. Right side: Warm charcoal grey background with three thin gold metric cards.
- **Slide Body Copy & Core Messaging:**
  - *Headline:* Addressing the Compound Climate & Health Crisis.<sup>8</sup>
  - *Classic Heat Stress:* Unventilated brick homes endanger the elderly and young during Karachi's heatwaves.
  - *Exertional Heat Stress:* Manual laborers working in industrial zones face high risks of dehydration and critical heat stroke.
- **Donor/Investor Pitch Angle:** Demonstrates that the trust does not just treat symptoms; it addresses the underlying environmental and climatic determinants of community health.<sup>8</sup>

## Slide 3: Youth Mobilization & Community Internships

- **Visual Composition:** Soft pearl off-white background (#FDFBF7). Full-width photo of **Image 1 of Batch 2**, showing the formal seated group of young volunteers, clinical interns, and trust coordinators under a yellow marquee canopy.

- **Slide Body Copy & Core Messaging:**

- *Headline:* Fostering a Compassionate Generation.<sup>6</sup>
- *Structured Internships:* Partnering with medical universities to host clinical rotations and youth-led public health projects.<sup>6</sup>
- *Empowered Volunteer Network:* Providing certified community service hours, training, and project management experience to youth.<sup>6</sup>

#### **Slide 4: Systematic Intake & Field Triage**

- **Visual Composition:** Left side: High-contrast photo from **Image 7 of Batch 1**, showing the busy registration desk under the blue patterned marquee canopy where staff and volunteers process welfare slips. Right side: White cards with emerald green headers.
- **Slide Body Copy & Core Messaging:**
  - *Headline:* Operational Excellence and Orderly On-site Intake.<sup>1</sup>
  - *Real-world Action:* Highlighting how crowds are managed systematically under direct volunteer supervision to protect patient dignity.<sup>1</sup>
  - *Systemic Welfare:* Linking the on-site intake directly to the formal *Medical Welfare Application Form* to ensure auditable record-keeping.<sup>1</sup>

#### **Slide 5: Gender-Inclusive Care & Pediatric Focus**

- **Visual Composition:** Left side: Clean photo from **Image 2 of Batch 2**, showing the female doctor in a white lab coat consulting a mother and child at the "فری میڈیکل کیمپ" (Free Medical Camp) desk with blue patterned fabric screens in the background. Right side: White bulleted list.
- **Slide Body Copy & Core Messaging:**
  - *Headline:* Overcoming Access Barriers for Women and Children.<sup>1</sup>
  - *Gender-Inclusive Medicine:* Deploying female clinicians, sonologists, and nurses to allow vulnerable women to seek maternal and general consultations comfortably.<sup>1</sup>
  - *Pediatric Care Demand:* Resolving the high-density demand for childhood medical screenings and treatments in impoverished settlements.<sup>1</sup>

#### **Slide 6: Case Study: Camp No. 01, Old Golimar**

- **Visual Composition:** Split-screen layout. Left side: High-contrast infographics of **Image 6 of Batch 2** ("6 Hours service, 320 registered patients, 30 emergency cases"). Right side: Core patient demographic cards.
- **Slide Body Copy & Core Messaging:**
  - *Headline:* Proving Outreach Impact through Empirical Data.<sup>1</sup>
  - *Gender Metrics:* Overwhelming participation of women and girls (208 patients) and men/boys (102 patients).
  - *Age Vulnerability:* Serving 124 children under 12, 163 adults, and 13 elderly patients, establishing a localized health green zone.

|                                                                       |                                |
|-----------------------------------------------------------------------|--------------------------------|
| CASE STUDY: CAMP NO. 01 (OLD GOLIMAR)                                 |                                |
| • 320 Total Registered Patients [Image 6]                             | • 124 Children Under 12        |
| • 30 Emergency Cases Treated [Image 6]                                | (Pediatric Care) [Image 3]     |
| • 208 Women & Girls Served [Image 8]                                  | • 163 Adults (12-60) [Image 3] |
| Metric: 100% free treatment & medicine delivered in 6 hours [Image 6] |                                |

## Slide 7: Administrative Cost Control & Overheads Audit

- **Visual Composition:** Soft pearl off-white background (#FDFBF7). Left side: Full table listing administrative costs from **Image 5 of Batch 2** totaling Rs 76,500. Right side: Financial control metrics inside a gold frame.
- **Slide Body Copy & Core Messaging:**
  - *Headline:* Absolute Administrative Cost Control.<sup>1</sup>
  - *Fiscal Discipline:* Every administrative rupee spent is meticulously audited, keeping overheads extremely low (Doctors: Rs 18k, Nursing: Rs 12k, Volunteers/Fuel: Rs 20k, Catering: Rs 15k, Food: Rs 4.5k, Generator: Rs 4k, Transport: Rs 3k).
  - *Donor Guarantee:* Maximum resource efficiency ensures that philanthropic capital directly funds clinical care rather than bureaucratic overheads.<sup>1</sup>

## Slide 8: Field Audits — Access, Readiness, and Transparency

- **Visual Composition:** Grid layout presenting the three core key findings panels from **Image 7 of Batch 2** ("ہنگامی حالات سے نمٹنے کی صلاحیت", "خواتین اور بچوں پر" بے مثال مالیاتی شفافیت", "ہنگامی حالات سے نمٹنے کی صلاحیت", "خواتین اور بچوں پر" بے مثال مالیاتی شفافیت").
- **Slide Body Copy & Core Messaging:**
  - *Headline:* The Three Pillars of Field Performance.<sup>1</sup>
  - *Pillar 1 (Exemplary Transparency):* Keeping admin costs low and directing 70% of total budget strictly to free patient medicines.<sup>1</sup>
  - *Pillar 2 (Emergency Capability):* Successfully treating 30 emergency cases on-site, proving the team's readiness for any medical crisis.
  - *Pillar 3 (Focused Outreach):* Delivering care to 208 women and 124 children, successfully targeting the community's most vulnerable groups.

## Slide 9: Hero Metric — Direct-to-Patient Allocations

- **Visual Composition:** High-impact recreation of the transparency graphic from **Image 4 of Batch 2**, featuring the large, bold green "70%" text with a pill icon inside the zero.
- **Slide Body Copy & Core Messaging:**
  - *Main Title:* "A Mirror of Public Service (خدمتِ خلق کا عکاس)".
  - *Hero Statistic:* **70% of the total budget is spent solely and exclusively on free medicines for patients.**
  - *Donor Accountability:* This ratio is clear proof of the financial transparency of Khidmat-e-Alam Welfare Trust and its unwavering commitment to delivering donations directly to the deserving.

## Slide 10: Seasonal Social Security — Annual Qurbani Program

- **Visual Composition:** Full-bleed presentation of **Image 10 of Batch 2**, showing the bright, professional "Eid-ul-Adha Mubarak" poster with the happy child hugging a goat and volunteers distributing food packets near a masjid.
- **Slide Body Copy & Core Messaging:**
  - *Headline:* Sharing Joy & Nutrition with Underprivileged Families [Image 10].
  - *Goat Qurbani* (وقف قربانی): Rs 22,000 per animal [Image 10].
  - *Cow Qurbani Share* (حصے کی قربانی): Rs 32,000 per share [Image 10].
  - *Impact Reach:* Providing direct meat distribution, transparent processing, and hygienic cold-chain transport to ensure nutritional security for thousands of families.<sup>8</sup>

## Slide 11: Proposed Clinical Infrastructure Projects (Capital Expansion)

- **Visual Composition:** A modern, clean architectural rendering of the planned hospital expansion wing.<sup>1</sup> Highlights capital rooms (such as the Neonatal ICU, Maternity Wing, and Eye Surgery Unit) using gold outline boxes.<sup>10</sup>
- **Slide Body Copy & Core Messaging:**
  - *Proposed Facilities:* Neonatal ICU (NICU), Maternity and Gynecology Wing (with 2 labor rooms and 4 OTs), specialized Dental Clinic, Eye Department & Operating Theater.<sup>10</sup>
  - *Diaspora Connection:* Inviting global and diaspora donors to sponsor specific rooms or equipment, complete with permanent dedication plaques and annual patient impact reports.<sup>11</sup>

## Slide 12: Call to Action — Partner with Us

- **Visual Composition:** A premium charcoal background with clean gold and emerald green text.<sup>1</sup> Displays direct banking details for corporate and individual routing.<sup>1</sup>
- **Direct Bank Routing Accounts<sup>1</sup>:**
  - *Zakat Accounts:* Meezan Bank (0185-0112385752), BankIslami (123100045020001), Soneri Bank (20012902299).<sup>1</sup>
  - *Donation Accounts:* MCB Bank (0124901010023773), Habib Metro (06-98-89-29301-714-0102177), Faysal Bank (3063301000004720).<sup>1</sup>

- **Closing Message (Warm Gold):** "Your support builds a healthier, stronger future for everyone. Partner with us today".<sup>1</sup>

## Section 10: National and Global Growth Acceleration Strategy

To expand its operations, reach more patients, and build a sustainable funding model, the trust can implement a strategic growth plan focused on donor engagement, digital tools, and local partnerships.<sup>1</sup>

### Digital Transformation of Donor Relations

International and diaspora donors often encounter a "trust gap" due to a lack of visibility into how non-profits manage and deploy their funds.<sup>12</sup> To bridge this gap, the trust can leverage modern digital tools:

- **Online Zakat Calculators:** Integrating a secure, user-friendly Zakat calculator on the trust's website ([www.khidmat-e-alam.org](http://www.khidmat-e-alam.org)) allows donors to calculate their obligations and route contributions directly to the trust's verified Zakat accounts with a single click.<sup>2</sup>
- **Real-Time Impact Dashboards:** Developing a public dashboard on the website to display live performance metrics—such as patients treated at the Medical Centre, RO water gallons distributed, or upcoming locations for the Free Medical Camps—provides clear proof of the trust's work.<sup>2</sup>
- **Frictionless International Payment Gateways:** Integrating secure, international payment processing systems on the donation portal allows global donors to make quick contributions using standard digital payment methods and international credit cards.

### Engaging the Global Pakistani Diaspora

The Pakistani diaspora in the US, UK, Europe, and the Gulf represents a powerful funding network for healthcare and development initiatives.<sup>12</sup> The trust can engage this network through structured programs:

- **Partnerships with Global Giving Platforms:** Partnering with registered fundraising organizations (such as the American Pakistan Foundation, GlobalGiving, or King Baudouin Foundation) allows donors in the US and UK to make tax-deductible contributions earmarked for the trust's projects.<sup>12</sup>
- **Matching Gift Programs:** Listing the trust on global corporate matched-giving platforms (like Benevity or YourCause) enables diaspora employees at major multinational companies to double the impact of their personal contributions.
- **Diaspora Board Chapters:** Establishing volunteer-led chapters in key international cities (such as London, Houston, and Dubai) helps build local donor networks, run targeted fundraising events, and secure support from overseas clinical professionals.<sup>11</sup>

## Section 11: Climatic Adaptation and Community Health Campaigns

The trust's health education programs are designed to address the direct impacts of climate change on public health.<sup>8</sup> In Karachi, rising global temperatures have led to increasingly severe summer heatwaves, representing a direct health threat to vulnerable populations living in informal settlements.<sup>8</sup>

To address this challenge, the trust runs targeted community awareness campaigns<sup>8</sup>:

## Heat Stroke Prevention Campaign

The trust's educational campaigns focus on explaining the two distinct types of heat stroke to help families identify symptoms and seek early treatment<sup>8</sup>:

- **Exertional Heat Stroke (جسمانی مشقت):** Primarily affects manual laborers, street vendors, construction workers, and young individuals performing heavy physical labor under the sun. Dehydration, muscle cramping, and rapid body temperature elevation are common warning signs.
- **Classic Heat Stroke (غیر جسمانی مشقت):** Frequently affects children, elderly individuals, and patients with chronic illnesses who are exposed to high indoor temperatures over extended periods. Poor ventilation in crowded housing structures increases this risk, even without direct sun exposure.

To support these educational efforts, the trust deploys its Disaster Response Cell during extreme heat waves to run community-wide emergency water distribution campaigns.<sup>8</sup> Under shaded canopies, volunteers wearing official red vests distribute bottled drinking water and oral rehydration solutions to manual laborers, street vendors, and pedestrians, providing immediate relief and preventing dehydration-related emergencies in high-risk zones.

## Climate Action and Community Resilience

The trust's environmental programs address the broader link between climate change and community health<sup>8</sup>:

- **Action for Climate Change:** This campaign focuses on raising public awareness about the health impacts of rising temperatures, shifting weather patterns, and environmental pollution.<sup>8</sup> By educating communities on basic environmental management, the trust helps local residents take proactive steps to protect their families' health.<sup>8</sup>
- **Safe Water From Tomorrow:** This water stewardship program promotes water conservation, safe storage practices, and hygiene measures to protect families from waterborne diseases, especially during summer months when water scarcity is most severe.<sup>8</sup>
- **Preventative Public Health Screenings:** Alongside water distribution, the trust runs localized screening camps to monitor blood pressure, check blood sugar levels, and provide early intervention for chronic conditions. This proactive approach helps detect potential health risks early, reducing overall emergency admissions at the central Medical Centre.<sup>1</sup>

By combining clinical medicine, environmental stewardship, and proactive community campaigns, the trust is building a comprehensive model of social care that addresses both immediate medical needs and the long-term determinants of health across metropolitan

Karachi.<sup>2</sup>
